

**RELEASE**

## Now selling products from SDP Industrial Corporation (SHANGHAI) Ltd.

We are pleased to inform you that we will be distributing a new product from SDP Industrial Corporation (SHANGHAI) Ltd.

### 5-phase stepping motor driver

## iD543-T

- Power supply: DC24V-48V
- Maximum output current(peak): 2.4A
- 8 current options
- 32 microstep options
- Pulse & direction, CW/CCW
- Photoelectric isolated input function
- Exquisite design, low noise, low vibration

**Best solution for  
“KR-A5M”  
replacement**

### 2-phase stepping motor driver

## iD232-T8

- Power supply: DC24V-36V
- Maximum output current(peak): 2.2A
- 8 current options
- 8 microstep options
- Pulse & direction, CW/CCW
- Automatic fault detection
- PWM constant current bipolar microstep drive
- Photoelectric isolated input function
- Motor short-circuit protection function
- Exquisite design, low noise, low vibration

We also offer various product types, including multi-axis models and network-compatible products. Please contact us for more information on specifications and pricing.
